Bringing Businesses and Communities Together

Chamber Master

Each member has their own personal login that will allow them the opportunity to post Job Listings as well as HotDeals in ChamberMaster. These can be seen on the Chamber's main website as well as in the actual listing for the member's business. Also, included will be a Map Image of the business, provided by Google Maps. This will allow visitors to see the location and get directions, all from the listing. ChamberMaster also provides a service called MarketSpace that allows members to create flexible ads. This feature can show everything from Real Estate listings to sales on pet food.

One of the most enhanced features will be the ability to create a 1600 character listing. This listing allows users to learn about members' businesses and to compare what different businesses can do. Members will also create 20 keywords about their business for the search feature.

This program also allows for a photo gallery and YouTube video link. Members' logos will also appear in the listing.

These photos can include captions and will run as a slideshow along the side of the individuals listing.

Banner advertisements as well as Premier Placement* can be purchased separately. Banner pricing will be dependent on where the banner is located. The 3 possible locations are Landing Page, Directory Page or Category Page.
